DETAILED ACTION

Introduction

The following is a non-final office action in response to the communications received on 6/2/2005. Claims 1-53 are now pending in this application.

Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-15 & 21, drawn to a method of payment in a commercial transaction, are classified in class 705, subclass 44.
 - Claims 16-20, 22-28 & 53, drawn to a method for financing a transaction are classified in class 705, subclass 39.
 - Claims 29-36 & 45-52, drawn to a method for financing a trade credit, are classified in class 705, subclass 40.
 - IV. Claims 37-44, drawn to a storage, processor and database computer system, are classified in class 235, subclass 381.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and inventions II & III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

Art Unit: 3696

does not require the particulars of the subcombination as claimed because a commercial transaction payment need not necessarily involve financing. The

subcombination has separate utility such as effecting a purchase without financing.

3. Inventions II and III are directed to related processes. The related inventions are

distinct if: (1) the inventions as claimed are either not capable of use together or can

have a materially different design, mode of operation, function, or effect; (2) the

inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as

claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the

inventions as claimed involve the financing of purchases in one case and B2B trade

credit in the other. Furthermore, the inventions as claimed do not encompass

overlapping subject matter and there is nothing of record to show them to be obvious

variants.

4. Inventions I, II & III and invention IV are related as process and apparatus for its

practice. The inventions are distinct if it can be shown that either: (1) the process as

claimed can be practiced by another and materially different apparatus or by hand, or

(2) the apparatus as claimed can be used to practice another and materially different

process. (MPEP § 806.05(e)). In this case the processes do not rely on a specific

apparatus for their practice.

5. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

6. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues.
